Table of Contents

1 Introduction

This resource is like a reference for all the snippets. If you wish to understand how the snippets work and some syntax related help, you should check out he UltiSnips: Snippets guide.

So the entire list is represented as a table, with columns explaining a certain aspect of the snippets.

2 Table Legend

1. **Trigger Word**: The trigger word is what needs to be typed in order to trigger the corresponding snippet. The snippet may be triggered automatically or by using the <Tab> trigger key.

2. **Description**: The description of the snippet.

3. **Priority**: Priority number of the snippet.

4. **Snippet Options**: The snippet options are the ones UltiSnips uses to understand how to and when to trigger the snippet, for more information, you can look up the snippet guide document

5. **Math Mode Only?**: Some snippets can be triggered only inside math mode and this is to distinguish those.

6. **Notes**: Some tips or remarks on the snippet.

3 Snippet Reference List
